

Elegant | Strong | Beautiful

Transforming Structures with Poly-Classic Columns

Turncraft Poly-Classic® Columns are the product of choice for homeowners and builders who demand beauty, value, and performance.

Poly-Classic Columns are architecturally proportioned from rotocast fiberglass-reinforced polymer—the most advanced construction material in the world—so pound for pound they're stronger than concrete, steel, or aluminum.

Beautiful Yet Practical

With the look-and-feel of natural stone, Poly-Classic Columns are available in popular tapered and non-tapered shafts that feature concise edges and meticulous attention to detail. Their hollow centers are useful as channels for downspouts, wiring, and plumbing, yet Poly-Classic Columns offer maximum load-bearing capacities and substantial resistance to deformation.
